Learn the ancient knowledge of **Ayurveda** – “*the science of life*”. This program teaches the fundamentals of *Ayurveda* for health *and* well-being and is based on international guidelines and benchmarks from around the world

This in-depth training qualifies you as an **Ayurveda Lifestyle Consultant**. This training is for anyone with an interest in Ayurveda. *Ayurveda* and *Yoga* are sister sciences and a knowledge of *Ayurveda* can help the *Yoga Teacher* to understand their students. It will benefit **Yoga Teachers** to understand the science of **Ayurveda** and how to implement its principles in *yoga* classes.

Ayurveda

Ayurveda is much more than a system of healing – it is an integral part of a larger body of knowledge that evolved from the teachings of sages (*rishis*). *Ayurveda* regards disease as an imbalance and offers ways to restore and preserve physical, emotional, and spiritual health by re-establishing the body's natural balance.

Ayurveda holds that there are five elements in nature and in the body: *ether*, *air*, *fire*, *water*, and *earth*. These elements are the foundation of all nature - including human beings. **Every** part of the human body is the manifestation of one or more of these elements.

The five elements combine in living organisms to form three basic forces, known as *doshas*, which exist in everything in the universe.

Some Ayurveda Principles:

- All things in the universe (both living and nonliving) are joined.
- Every human being is made up of these 5 elements in the universe.
- Most people are born in a state of balance within themselves.
- This state of balance is disrupted by the processes of life.
- Imbalances weaken the body and make the person susceptible to disease.
- Disease arises when a person is out of harmony with the universe.

‘When Diet is wrong Medicine is of no use. When Diet is correct Medicine is of no Need.’

~ Ayurvedic Proverb

Learning Outcomes

This training is based on international guidelines and benchmarks from around the world. Graduates of the program will be able to consult with clients, family, and friends, helping them achieve higher levels of health and wellness through Ayurveda.

What you will learn:

1. **Body Type:** how to assess an individual's constitutional type, the basis of their personalised Ayurveda wellness program.
2. **Prevention:** how to identify and eliminate the root imbalances that may contribute to health disorders.
3. **Observation Skills:** traditional Ayurvedic skills for assessing body type and imbalances.
4. **Diet and Nutrition:** an individualized approach that addresses nutritional imbalances at the root of health disorders.
5. **Rejuvenative Approaches:** natural modalities to enliven the body's innate self-repair and healing mechanisms. You will learn the principles of Ayurveda as a healing science.
6. **Detoxification:** traditional Ayurvedic procedures for clearing toxins from the body that may contribute to chronic health issues.
7. **Stress Reduction:** how to apply scientifically validated approaches to stress-reduction and mind-body balance.
8. **Lifestyle Guidelines:** personalised daily routine and lifestyle recommendations to prevent behavioural mistakes that cause health problems.
9. **Additional Natural Modalities:** - yoga postures, food supplements, aromatherapy, mantra/sound therapy etc.

Program Assessments

1. **Final Assessment:** Designed to assess student understanding of the core principles of Ayurveda.
2. **Clinical Case Portfolio:** 10 cases studies. Students must demonstrate competence in evaluating the level of balance, causative factors, and Ayurvedic pathology, recommending appropriate measures to restore balance through stress reduction, lifestyle, diet, spices, herbal supplements, meditation, yoga, and other modalities.
3. **Internship Evaluation Form:** Completed by on-site lecturers to evaluate competencies in compassion, personal responsibility, diligence, and teamwork.
